## EDUCATION

Lamrin Tech Skills University, Rupnagar

Bachelor of Computer Science – Specialization in Cyber Security

Punjab, India

2024 – Present

## SKILLS SUMMARY

- **Languages:** Python, C++, HTML, CSS, Java
- **Tools:** Nmap, Wireshark, John the Ripper, Git, GitHub, Django
- **Platforms:** Kali Linux, Visual Studio Code
- **Soft Skills:** Leadership, Team Management, Problem Solving, Communication

## WORK EXPERIENCE

- **Cybersecurity Intern | Codec Technologies** July 2025 – September 2025
  - Assisted in penetration testing and vulnerability assessments for client systems.
  - Used tools like Nmap, Wireshark, and John the Ripper for security analysis.
  - Created detailed reports highlighting security gaps and recommended remediation measures.
- **Hackathons & Competitions**
  - Intel® AI Global Impact Festival 2025 – Participated in AI-driven solutions for global challenges.
  - Apexathon 2025 – Collaborated with a team to develop a data-driven project at Chandigarh University, hosted by APEX Institute of Management.
  - Ideathon by Chandigarh University – Proposed innovative tech solutions to real-world problems.
- **Training**
  - AR/VR Training – NIELIT Ropar – Learned fundamentals of Augmented and Virtual Reality development, including Unity 3D and immersive environment creation.

## PROJECTS

- **VAANI: EEG Simulator – Brain-Computer Interface Demo**  
Next.js, Tailwind CSS, Radix UI, Recharts, AI/ML
  - Developed a real-time EEG simulation platform demonstrating brain-computer interface (BCI) concepts, including emotion detection and intent prediction.
  - Implemented AI-powered emotion classification and personalized wellness recommendations.
  - Created interactive brain state visualizations and a data processing pipeline diagram.
  - Added advanced features like text-to-speech feedback, mood journaling, PDF report generation, and custom EEG data uploads.
  - Designed a modern, responsive UI with dark/light themes and interactive charts, optimized for desktop and mobile.
- **Password Generator & Strength Checker**  
HTML, CSS, JavaScript
  - Built a secure password generator with customizable criteria (length, character sets).
  - Integrated a strength assessment algorithm to score password security in real time.
  - Delivered a responsive, user-friendly interface for both desktop and mobile.

## CERTIFICATE

- **Summer Analytics 2025 – Indian Institute of Technology, Guwahati** (Jul 2025)  
Credential ID: 96e2a6bf-30aa-433d-ba7f-0b702cf15f62
- **Cybersecurity Analyst Job Simulation – Tata Group (Forage)** (May 2025)  
Credential ID: RJ8DLp6QRiankHKDo
- **Understanding the EU Cyber Resilience Act – The Linux Foundation** (Apr 2025)  
Credential ID: LF-2wr39p9tsm
- **Augmented & Virtual Reality Acceleration – NIELIT** (Jan 2025)  
Credential ID: FSP/BCMP/NIELITCHD/ARVR/CDACPUNE/01/2501/108
- **Cyber Security Fundamentals – IBM Security Learning Academy** (Nov 2024)  
Credential ID: URL-72EDBD9DIB31
